Editorial policy

This FDK Group Environmental Report offers to disclose the environmental activities of the FDK group, aiming at informing its environmental policies, activities and the like to various stakeholders including investors, customers, regional societies, local governments and so on.

To create this report that is easy to understand, we used many graphs, charts, and so on, referring to the "Environmental Report Guideline (FY 2003 edition)" by the Ministry of the Environment, etc.

This 2005 edition covers the extended environmental information especially on overseas manufacturing subsidiaries and English version is now available.

This report aims at promoting interactive communications between the FDK group and you. It is scheduled to issue every year to make our best effort to explain you our environmental activities clearly. We welcome your feedback. Please send us your comments by fax or letter using an enclosed questionnaire.
