

# Noise suppression IEEE1394 cable

NSC-IEEE04/05 series

Built in ferrite compound for noise suppression.

While its appearance is the same as a usual cable, it significantly reduces internal and external noises.

Good for digital video cameras, PCs, DVDs and so on, having i.link interface.

Great match for bulk data transfer of digital video cameras and so on. Compared with normal cables, high-speed communication can be still possible under the environment where it is vulnerable to receive noises.

## Feature

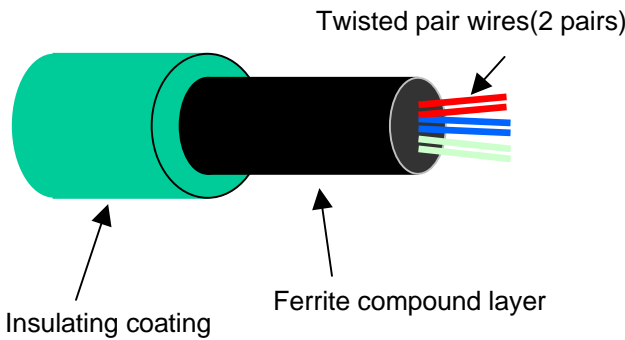

- Significantly reduces internal and external noises.
- Diameter and flexibility of cables are the same as our conventional products.
- Support peak transfers up to 400Mbps

## Basic specification

- Twisted pair wires.
- 4pin male to 4pin male connectors or 6pin male to 4pin male connectors.

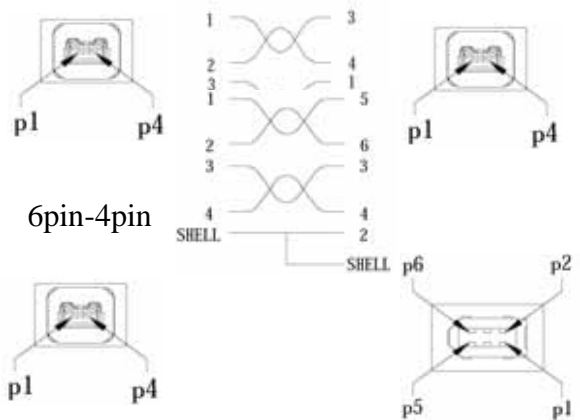

## Inner structure of cable

## Connection specification

### 4pin-4pin

## EMI generation (cable length 2m)
