

# Noise suppression display cable

NSC-RGB01 series

Built in ferrite compound for noise suppression.

While its appearance is the same as a usual cable, it reduces internal and external noises with those with a ferrite core more than equivalent.

Applicable to use for DOS/V & its compatible and Macintosh ideally suited for high definition displays or LCDs. Compared with a usual display cable, it is possible to suppress flickering of a screen by static electricity or noise.

## Feature

- 75Ω coaxial code
- Significantly reduces internal and external noises
- Space-saved by adopting mini connectors

## Basic specification

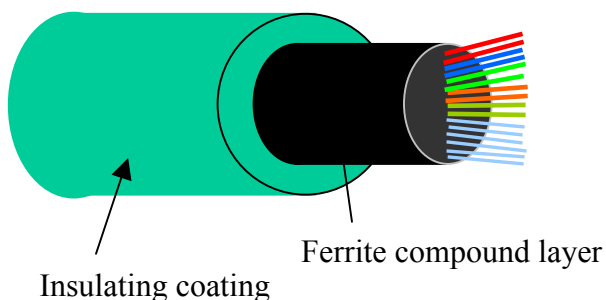

- Two D-sub 15 pin (mini) male connectors
- Cable color : ivory

## Application

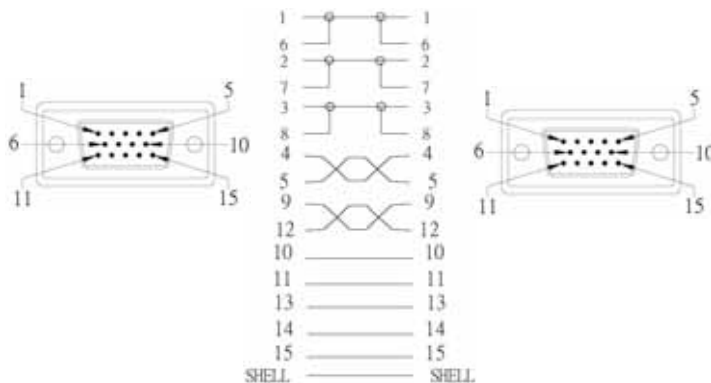

- DOS/V & its compatible
- Macintosh

## Inner structure of cable

## Connection specification

## EMI generation (cable length 3m)
