

Noise suppression USB2.0 A-mini B cable

NSC-USB02 series

Built in ferrite compound for noise suppression.

While its appearance is the same as a usual cable, it significantly reduces internal and external noises.

This is a cable which connects a company PC to peripheral equipment such as a digital camera having USB connector (mini-B).

Compared with normal cables, high-speed communication can be still possible under the environment where it is vulnerable to receive noises.

Feature

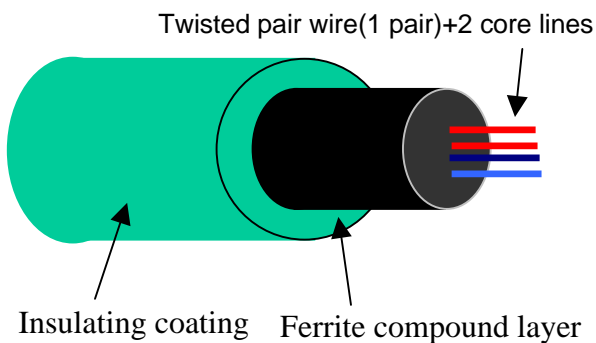

- Support peak transfers up to 480Mbps
- Significantly reduces internal and external noises
- Diameter and flexibility of cables are the same as our conventional products.

Basic specification

- USB A type male to mini B type male
- Cable color : black

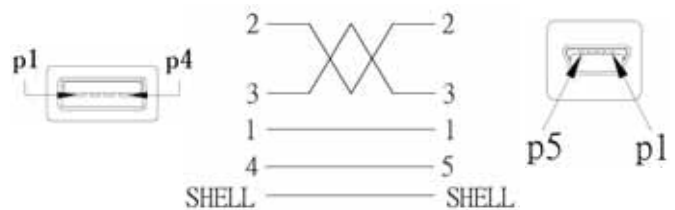

Inner structure of cable

Application

- DOS/V & its compatible
- Apple iMac
- G4

Connection specification

EMI generation (cable length 1.5m)
